Thank you for being an Amazon customer. Get \$50 off: Pay \$249.00 \$299.00 upon approval for Amazon Visa.

- Emergency EV Breakaway Connector: The EVject lets you quickly disconnect and drive away in emergencies without leaving your car.
- Enhanced Protection: Safeguard yourself from threats like dangerous individuals and adverse weather while charging your EV.
- NACS Vehicle Compatibility: Fully compatible with all NACS vehicles, including Cybertruck, Model Y, Model 3 (2019+), Model S (2022+), and Model X (2022+).
- Easy Installation: The EVject is simple to attach to the charger's head and ensures a seamless charging experience with Level 1, Level 2, and DC fast chargers, making it the perfect EV charging adapter.
- Peace of Mind: EVject has a unique warranty for free replacement if used in emergencies; just provide proof of use. It is compatible with the Tesla universal wall connector.

David Moon  
★★★★★ Seems to work so far!  
Reviewed in the United States on July 15, 2024  
Verified Purchase  
Saw this product and thought this is an amazing idea. I drive very long (>1000 mi) stretches in my EV and frequently find myself pulling into Supercharger stations at all hours of the night. While most of the stations are located in somewhat well-lit areas like hotel and shopping center parking lots, some are very dark and kinda spooky, often right up against a row of trees. More than once I've thought that this could be a decent ambush spot for someone who wanted to mug or carjack someone.

So when I saw this product in passing, I immediately looked into it further and came to this product page. I only saw one review and it said it didn't work at all and I thought that was odd because it "seemed" like it would work (otherwise why sell it) but was open to the idea that some subsequent Tesla software or even connector update put in place after this product was released might have rendered it useless. Still, with Amazon's good return policy in mind, I decided to check it out for myself.

The device is pretty obvious in how it fits together. Plug the charger into one end and the other end into the vehicle. There is also a "trigger" on the underside of the device that is important to utilize.

★☆☆☆☆ Doesn't work  
Reviewed in the United States on June 19, 2024  
Verified Purchase  
I have a 2022 Model y. I tried the EVject Tesla connector on both a v3 supercharger and a j1772 level 2 charger and multiple tries the Tesla says charging cable is still connect when you press unlock charging port. Really disappointed. Will be returning.

Michael  
★★★★★ Provides options and peace of mind  
Reviewed in the United States on July 15, 2024  
We were sitting at a Supercharger in Florida, when two sketchy guys came up and demanded we open the door and let them sit in our Tesla. They keep walking around the vehicle and taking pictures. We could not drive away - the option to shift gears was disabled because we were plugged-in. My wife was freaked out. She said, she would never Supercharge alone without an option to drive away in this type of situation. Now she always has this EVject in her car and has options to get to safety.

★★★★★ Daughter charges in the hood

Reviewed in the United States on July 13, 2024

I bought this for my daughter as she charges in a little bit shady place in NJ. It is great knowing she can just pull away if she approached by a rando. Great Idea and works as expected.
